## OBJECTIVE

Development Engineer with hands-on experience in ADAS systems, HiL testing, and vehicle development. Seeking to contribute to the design, validation, and optimization of vehicle and intelligent mobility technologies.

## EDUCATION

|                                                                                                                                                                       |             |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Masters in Commercial Vehicle Technology</b> , Technical University of Kaiserslautern<br>Grade: 2.1 (90%). Additional <i>Focus</i> : Electric and Hybrid Vehicles. | 2018 - 2022 |
| <b>Bachelors of Engineering in Mechanical</b> , NMAM Institute of Technology<br>Grade: 1.7 (90%). Additional <i>Focus</i> : Automotive and Production.                | 2013 - 2017 |
| <b>Pre- University College</b><br>Grade: 1.2 (96%)                                                                                                                    | 2011 - 2013 |

## SOFTWARE KNOWLEDGE

|                           |                                            |
|---------------------------|--------------------------------------------|
| <b>Programming</b>        | MATLAB/Simulink, Python, C++, Shell, Batch |
| <b>Virtual Validation</b> | ControlDesk, Scalexio                      |
| <b>Requirement Tools</b>  | DOORS, Codebeamer                          |
| <b>Measurement Tools</b>  | CANoe, CANape, INCA                        |
| <b>Version Management</b> | GitHub, SVN, Jenkins                       |
| <b>Atlassian Tools</b>    | JIRA, Confluence, Bitbucket                |
| <b>Virtual Simulation</b> | VTD                                        |
| <b>Diagnosis Tools</b>    | ODIS, IDEX, CP-Tool                        |
| <b>Testing Tools</b>      | ECU-TEST, PROVETech, EXAM                  |

## EXPERIENCE

|                                         |                                                |
|-----------------------------------------|------------------------------------------------|
| <b>Development Engineer</b><br>IAV GmbH | May 2023 - Today<br><i>Ingolstadt, Germany</i> |
|-----------------------------------------|------------------------------------------------|

### Project 1: ADAS Test Bench Conceptualization

- Conceptualized and designed an ADAS Hardware-in-the-Loop (HiL) test bench for AUDI.
- Commissioned the test bench and integrated software components into hardware systems.
- Developed and implemented virtual simulation environments for system validation.
- Performed ECU calibration and functional testing to ensure system accuracy and performance.  
Tools: ControlDesk, CANoe, CANape, VTD, ODIS, IDEX, Python, Jenkins, GitHub, JIRA, Confluence

### Project 2: ADAS Functional Development and Testing

- Developed comprehensive test methodologies for the WBA (Warning and Brake Assist) function to ensure functional accuracy and reliability.
- Analysed test specifications and assessed test infrastructure to align with project and system requirements.
- Designed and implemented automated test cases using EXAM for efficient software validation.
- Evaluated and analysed test results across complete software releases, ensuring compliance with defined specifications and safety standards.  
Tools: EXAM, CANape, CANoe, DOORS

### Project 3: Test Specification and Implementation

- Developed detailed test specifications for Advanced Driver Assistance System (ADAS) functions in alignment with project requirements.

- Implemented specified test cases on HiL platforms to enable automated testing and efficient verification.
- Automated test execution on Component HiL and conducted result analysis to validate ADAS functionality and performance..
- Performed requirements and signal analysis to ensure accurate test coverage and system validation.  
Tools: ECU-TEST, IBM DOORS, Codebeamer, CANape.

## **Software Test Engineer**

Marquardt GmbH

Oct 2022 - Mar 2023

*Tuttlingen, Germany*

Project : Smart Key Access

- Defined and extended test concepts and functions for next-generation HiL test benches to enhance system validation capabilities.
- Managed hardware and software integration between control units and test benches for seamless operation.
- Developed and automated test cases to verify accurate functional implementation and system performance.  
Tools: Provtech TA, CANape, CANoe, DOORS.

## **Intern**

Robert Bosch GmbH

Apr 2021 - Sep 2021

*Schwieberdingen, Germany*

Project: Exhaust after gas treatment

- Automated software testing using HiL systems by translating requirements into concrete, executable test cases and integrating them into the test environment.
- Executed, analysed, and optimized automated test cases to ensure accurate system functionality and improved test efficiency.  
Tools: ECU-TEST, ETAS INCA, ETAS MDA, MATLAB.

## **ACADEMIC PROJECTS**

---

### **Kaiserslautern Racing Team**

University of Kaiserslautern

Jul 2020 - Oct 2020

*Germany*

- Member of the microelectronics department. HiL testing of indicator lights, BSPD plate and shutdown circuit.

### **Seminar Electromobility**

University of Kaiserslautern

Mar 2019 - Aug 2019

*Germany*

- Topic: 'Energy management and battery SOC optimization of Mercedes A Benz 170 parallel hybrid Vehicle'. Development of Matlab scripts for torque vectoring, start-stop and regeneration functionalities. Optimization of torque split ratio and state of charge using FTP 75 and NEDC driving cycle.

### **Regenerative Suspension**

NMAM Institute of Technology

Aug 2016 - Apr 2017

*India*

- Group Leader, responsible for design and analysis. Driving vehicle axles using suspension systems reduced the consumption of engine power by 4% and thus lowered fuel consumption.

## **LANGUAGES**

---

English, German, Hindi, Kannada.

## **STRENGTHS**

---

Teamplayer, Willingness to learn, Flexible, Reliable, Independent, Critical Thinking.

## **HOBBIES**

---

- Music, Cooking and Sports.

Chandrakanth Pavanaskar

Ingolstadt, 09.11.2025
